

Oracle EBS Application Enablement

for a Leading Tourism Company

CASE STUDY

Experience

The Oracle EBS training experts at Clover Infotech ensured that the end-user is hands-on with the application and delivered seamless transition between applications.

The Challenge

The customer was using Tally systems prior to using Oracle EBS R12 systems. The customer wanted us to train their end-users as these users had no prior hands-on experience of Oracle EBS.

They wanted to ensure end-to-end user training and smooth change management. The business processes also had to be set-up as per the existing system configurations.

The Solution

Clover Infotech ensured smooth implementation of Oracle EBS Financials and streamlined existing business processes.

We trained the end-users with hands-on experience of the application. We also trained them on documentation necessary to streamline the 'requirement to deployment' process.

Our team integrated multiple business units with Oracle EBS R12. We completed Mirror Replication from payables to receivables. We also completed Auto Reconciliation Process for Banks, Vendors, Debtors, and other Modules.
