

# Upgradation and Accessibility of Forms and Reports

for a Leading Entertainment Company

CASE STUDY

# Performance Enhancement

Our Application Solution enabled the customer to seamlessly upgrade their application infrastructure layer to enhance the performance and centralize them for easy access to users across geographies.

# The Challenge

The customer wanted to migrate more than 1000 Forms and Reports from 6i to 10g version in a short period of time.

They wanted to migrate to a three-tier architecture from the existing two-tier architecture by installing Oracle Applications server.

They wanted to migrate from a client server to a web-based model to have centralized control and scalability.

The customer wanted to upgrade to Oracle Forms 10g to leverage investment in Oracle Forms and take advantage of service-oriented architecture.

They wanted to provide users across multiple locations in India with 24-hour access to business applications.

The customer wanted to support an increasing number of users across remote locations.

# The Solution

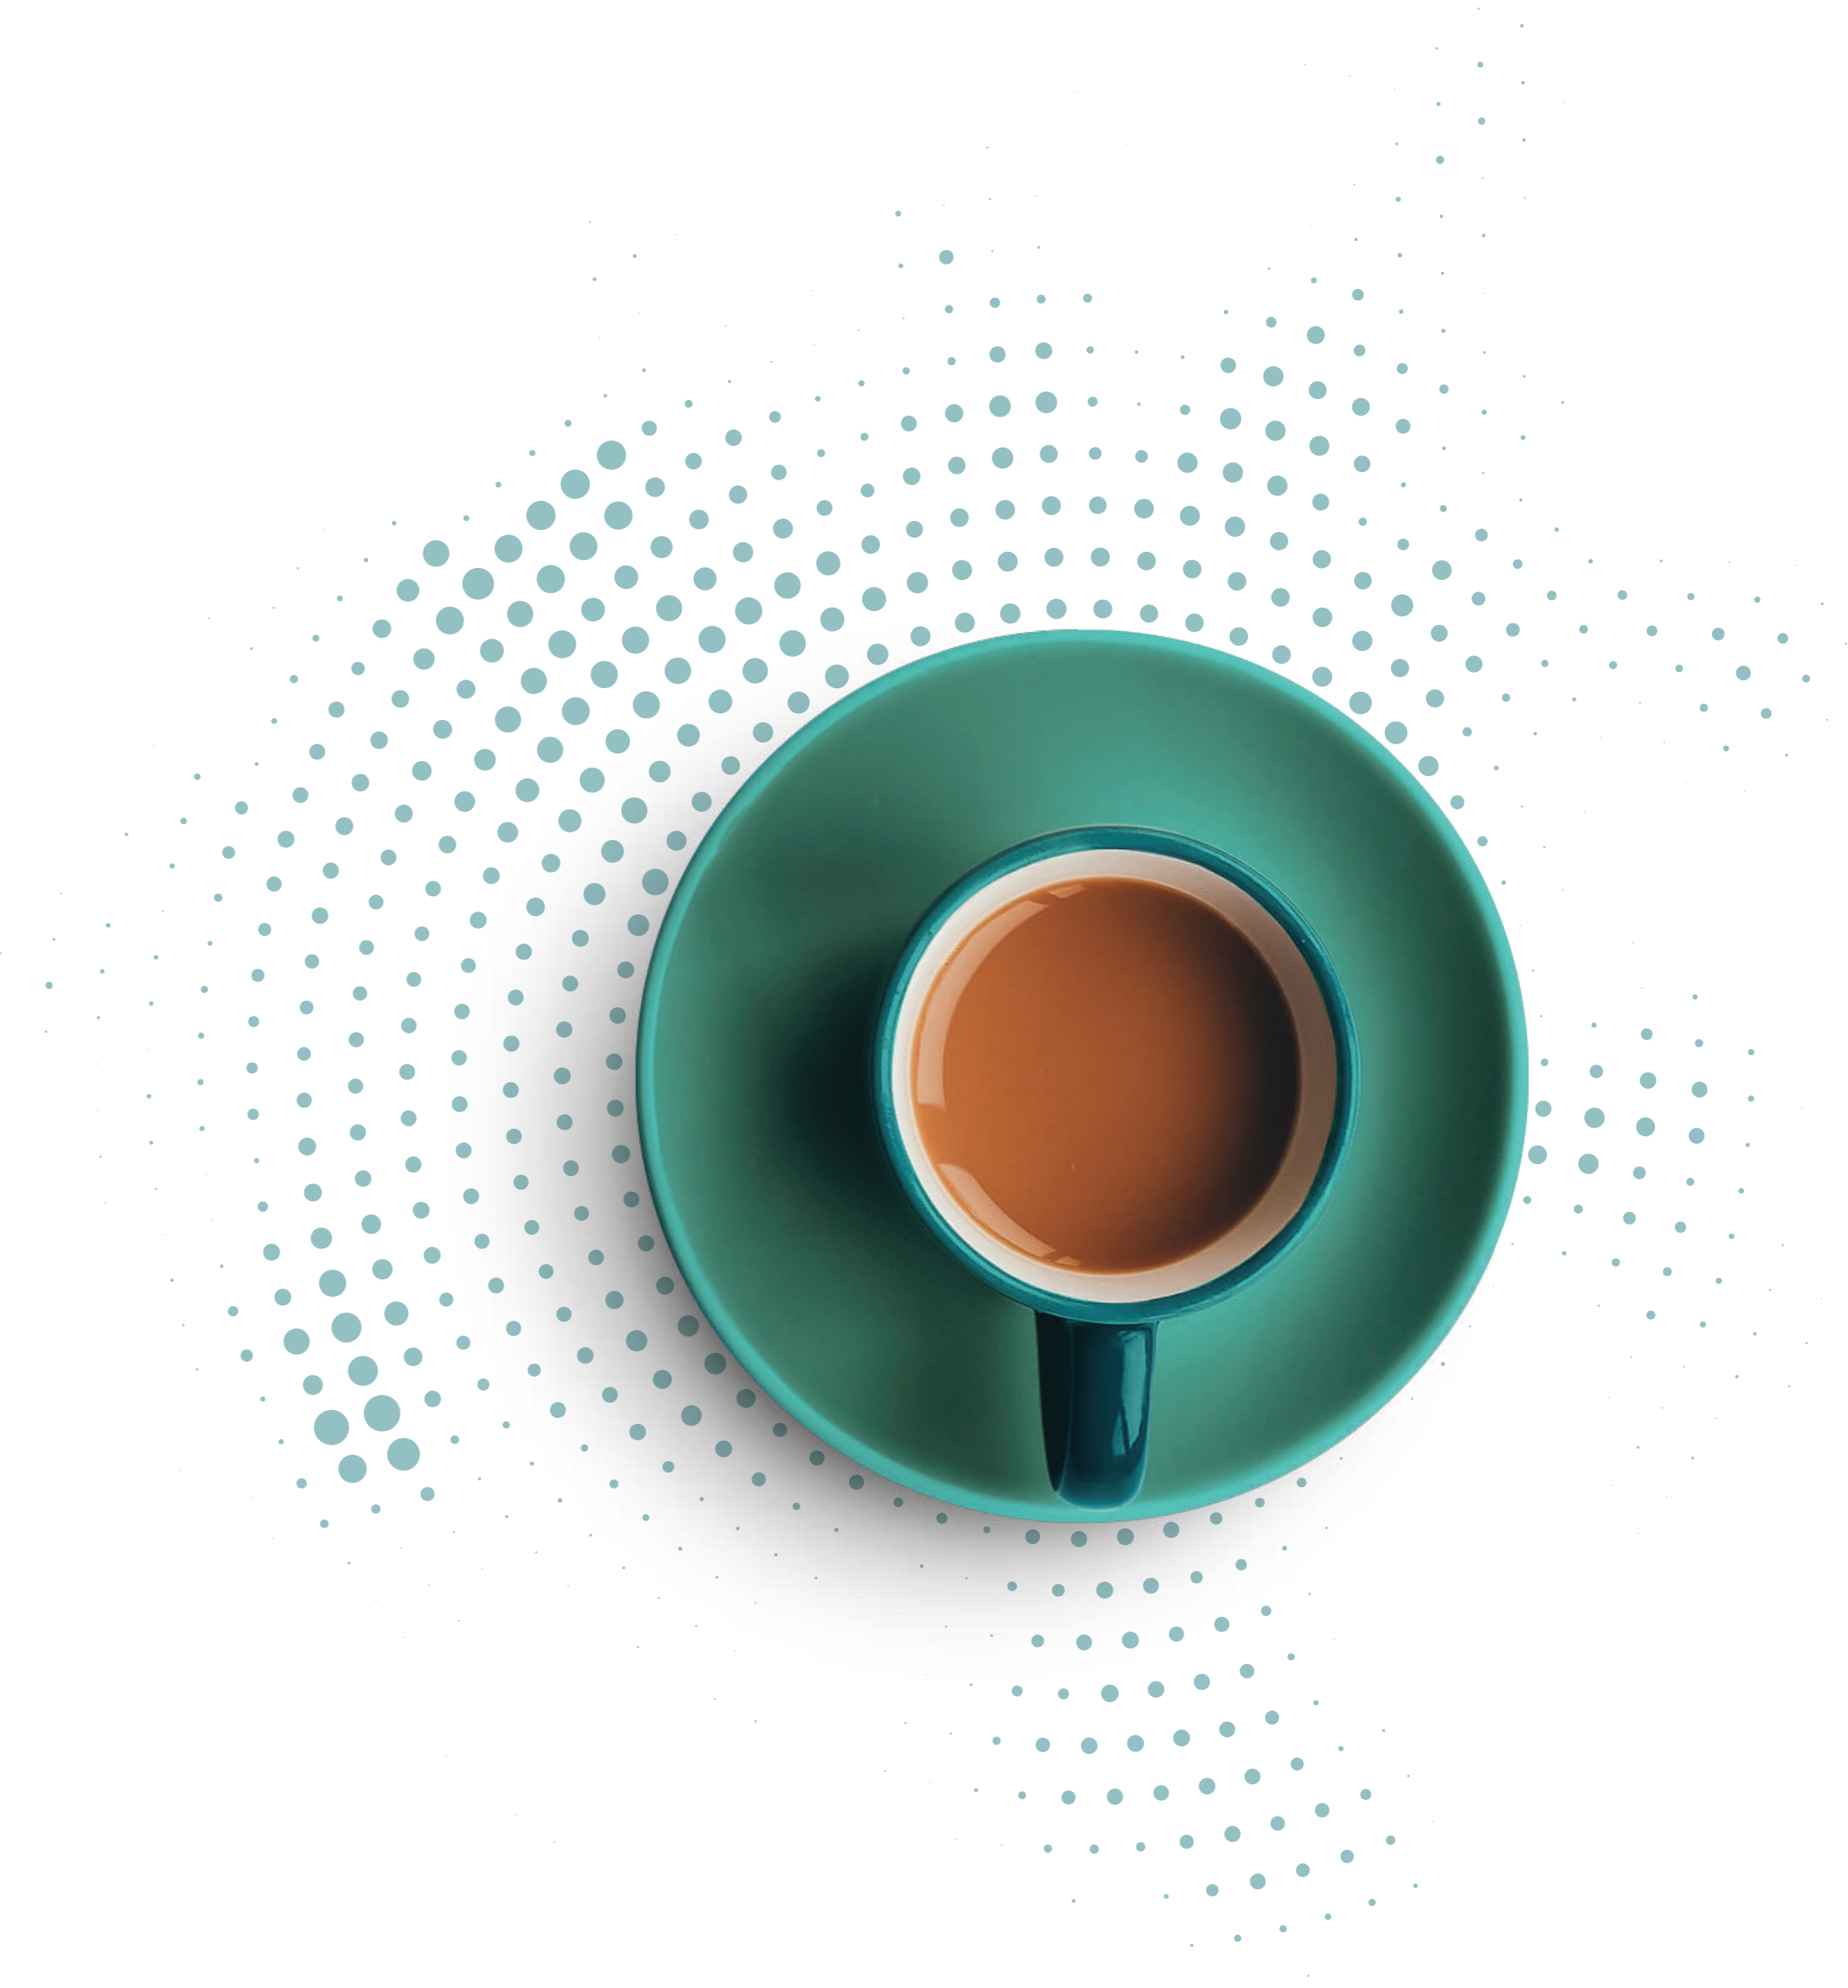

Clover Infotech successfully migrated more than 1000 Oracle Forms and Reports from 6i to 10g version in less than 3 months (well within the timelines given to us by the customer)

We successfully installed Oracle Applications server helping the customer migrate to a three-tier architecture.

We reduced the cost and complexity of installing, configuring, and administering applications by moving to a web-based architecture.

We ensured that users could access business reports over the web in a variety of formats, including HTML, PDF, and RTF.

We deployed a scalable and reliable architecture that could easily be extended to support larger number of users across India.

We are just an email away
