CLOVER INFOTECH

Automation of Corporate Salary Processing

for a Leading Private Sector Bank

CASE STUDY

Workload Automation

Clover Infotech's solution enabled to reduce manual workloads for Finance team and IT team. The incidents of human errors in the process was significantly minimized.

The Challenge

Our customer (a leading bank) processes salaries of employees of the organizations that bank with it at end of every month

Customer's finance team validates the file received from respective organizations' finance teams and credits the salary to relevant accounts

The file that is validated by the customer's finance team goes through a maker-checker process before it gets finally deployed

This process was prone to manual errors

The Solution

Clover Infotech deployed an automation solution using ‘Automation Anywhere’ as the RPA tool

The team automated the entire process by training the RPA bot to understand set of rules defined by the customer's finance team

The money was automatically credited into respective employee accounts as per the defined process

We are just an email away
