

# Automation of Business-Critical Reports

for a Leading Bank

CASE STUDY

# Reports

Clover Infotech's solution enabled the customer to meet their ever-growing business needs by automating business processes, creating dashboards, and generating reports for 24x7 visibility on information.

# The Challenge

The customer wanted to enhance capabilities of their Oracle ERP system to match their business growth.

They wanted to automate planning, budgeting and other key business processes. They wanted to implement a legal entity structure that could meet future legal and operational requirements.

The customer also wanted a solution that enabled a unified view of information. They wanted a solution that could provide visibility to accurate & critical information to key decision makers at all times.

They wanted to create a robust and integrated IT infrastructure to support business growth.

# The Solution

Clover Infotech upgraded the existing Oracle ERP system to R12. It included architecture changes, and implementation of High Availability & Disaster Recovery solutions to ensure 24x7 availability and minimize data loss in case of any unforeseen disasters.

New Modules such as FA, CM, Budgets, iProc & Purchase were implemented to automate required processes. We also implemented Global consolidation & Global Intercompany Systems to enable unified view to information.

We also implemented Multi-Org Access Control Architecture to ensure data & information security and visibility at multiple organization levels. Our team also upgraded the database to latest version to enhance and support business growth.
